

# fertileeze

## Fertilizing just got a lot easier!

### “Standard”

Funnel

**Choice of two closed containers & Funnel, or one "Open" container and Lid**

**Warranty:** Fertileeze comes with a full one year warranty covering all parts and labor, as used under normal conditions and intended purpose.

**Instructions:** Upon receiving your fertileeze you should find the, (patent pending), Wand, two green custom containers, a fast fill funnel, and two teaspoon clips, (one extra), Instructions and Warranty. There is no assembly required. Snap the funnel onto each container and fill with controlled released fertilizer. Attach wand to one container and cap on the other for later use and you are ready to go.

**Caution!** Never use any materials in fertileeze other than coated controlled release fertilizers or products with a similar smooth granular size. Other materials, such as fine, powdery herbicides or organic fertilizers may cause permanent damage to your applicator.

Hold the wand steady with your lower hand and the container at shoulder height by the handle. With each pump of the container, fertileeze will deliver a table spoon of material. By snapping the clip to the top of the inner wand fertileeze will deliver a teaspoon.

Fertileeze is calibrated for most controlled release fertilizers, however, quantities may vary slightly with different material densities.

Always wear gloves and appropriate clothing as required by the manufacturer when handling chemicals. When not in use, always store fertileeze in a vertical position.
