

# Specimen Label

**PRINCIPAL FUNCTIONING AGENTS:**

|  |             |
|--|-------------|
| Proprietary combination of oils and emulsifiers..... | 99%         |
| Constituents ineffective as a spray adjuvant.....    | 1%          |
| <b>TOTAL.....</b>                                    | <b>100%</b> |

All ingredients are exempt from tolerance under 40 CFR 180.

**KEEP OUT OF REACH OF CHILDREN  
WARNING**

Causes severe eye irritation. Harmful or fatal if swallowed. Avoid contact with skin, eyes or clothing. Do not take internally. Do not eat, drink, smoke or chew gum while using this product. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. In addition, follow precautionary statements on all products used with this material. Clean affected clothing, shoes, and protective equipment before reuse.

**Personal Protective Equipment:** Wear chemical-resistant eyewear and gloves, long-sleeve shirt and pants and shoes and socks.

**FIRST AID**

**Call a poison control center or doctor immediately for treatment advice.**

Have the product container with you when calling a poison control center or doctor, or going for treatment.

**If Swallowed:** Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

**If on Skin or Clothing:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.

**If Inhaled:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth to mouth if possible.

**If in Eyes:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses if present, after the first 5 minutes, then continue rinsing eye.

**GENERAL INFORMATION**

**ELITE VELOCITY** is used as a spray adjuvant to improve deposition of spray droplets. **ELITE VELOCITY** improves spreading and reduces the production of fine droplets which are susceptible to movement from the spray pattern.

The degree of drift hazard varies with the type of pesticide, application conditions and the vegetation near sprayed area. This product is intended as a management tool to reduce drift and improve deposition. Common sense and sound application technology must be followed when spraying pesticides.

**ELITE VELOCITY** does not produce large spray droplets like some polymer drift products. Internal cohesion of the components helps prevent droplet shearing into fines which move off target.

**DIRECTIONS FOR USE**

**ELITE VELOCITY** may be mixed with pesticides in conventional spray equipment but should be the last additive prior to completely filling the spray tank with water.

**ELITE VELOCITY** may be applied through direct injection systems when pumped with proper amount of water. Do not premix with EC's or aqueous solutions. Ensure adequate rinse between additives.

**USE RATES**

Determine proper rate of product based on type of application and type of formulation being used. Do not exceed 1% v/v of the spray solution. Product should be the last additive prior to completely filling the spray tank with water.

**Suggested use rates with pesticide formulation:**

|                                |                        |
|--------------------------------|------------------------|
| Emulsifiable Concentrates:     | 4 to 6 ounces per acre |
| Aqueous based solutions:       | 4 to 6 ounces per acre |
| Dry Flowable-Wettable Powders: | 4 ounces per acre      |
| Liquid Flowables:              | 4 ounces per acre      |
| Insecticides:                  | 2-4 ounces per acre    |

The addition of an adjuvant to some pesticides, pesticide combinations, and/or fertilizers may cause phytotoxicity to the foliage and/or fruit of susceptible crops or nontargeted vegetation. Prior to the addition of the product to a spray tank mix, the user or application advisor must have experience with the combination and/or must have conducted a jar test for compatibility.

**Aquatic Use: ELITE VELOCITY** can be used for aquatic applications including surface water. Always follow tank mix product labels for specific directions and precautions. **ELITE VELOCITY** use rate of 4-6 oz./A. Do not exceed 6 oz./A.

**STORAGE AND DISPOSAL**

**Storage:** Store in a cool, dry place. Store in original container only. Do not add anything to the container. Keep container tightly sealed when not in use. Do not store near fire, flame or other potential sources of ignition. Do not contaminate water, food or feed by storage or disposal of this product. For optimal storage, store between 40° and 90° F.

**Disposal:** Do not reuse empty container. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal if allowed by law. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at [www.acrecycle.org](http://www.acrecycle.org). Decontaminated containers and **ELITE VELOCITY** materials must be disposed of in a manner allowed by local, state and federal laws and regulations.

**WARRANTY**

Red River warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, expressed or implied, extends to the use of this product contrary to the label instruction, or any abnormal conditions, or under conditions not reasonably foreseeable to Red River, and buyer assumes the risk of any such use.
