SAFETY DATA SHEET

Revision Date: 09/30/2015

1. IDENTIFICATION OF THE SUBSTANCE/PREPARATION AND COMPANY

Product Name: Roots Fertilizer for Trees 27-9-9; Roots PHC for Trees 27-9-9

Recommended use:

This product is a mixed water dispersible tree fertilizer.

Supplier/Manufacturer

Lebanon Seaboard Corporation 1600 East Cumberland Street Lebanon PA 17042 800-233-0628 (717-273-1685)

Emergency telephone numbers:

Chemtrec (Spill) 1-800-424-9300

• Prosar (Health) 888-208-1368

2. HAZARDS IDENTIFICATION

Signal Word: Warning

<u>Hazard Category</u>: Oxidizing Solid, Category 3.

Hazard Statements and Category

H272: Contains an oxidizer. May intensify fire. (Category 3)

H302: Harmful if swallowed. (Category 4)

H315: Causes skin irritation. (Category 2)

H319: Causes serious eye irritation. (Category 2A)

H335: May cause respiratory irritation.

8

Precautionary Statements

P210, P220: Keep away from heat/sparks/open flame/hot surfaces, from clothing, and from other combustible materials. No smoking.

P221: Take precautions to avoid mixing with combustibles.

P261: Avoid breathing dust.

P264: Wash hands and exposed skin thoroughly after handling.

P270: Do not eat, drink or smoke when using this product.

P280: Wear protective gloves/protective clothing/eye protection/face protection.

P283: Wear fire/flame resistant/retardant clothing.

P301, P310, P330: IF SWALLOWED: Rinse mouth. Immediately call a POISON CENTER or doctor/physician.

P304, P340: IF INHALED: remove victim to fresh air and keep at rest in a position comfortable for breathing.

P305, P351, P338, P337, P313: If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

P332, P313: If skin irritation occurs: Get medical advice/attention.

P371, P380: In case of major fire involving large quantities, evacuate area.

P378: Use extinguishing media suitable to local circumstances and the surrounding environment. Options include water spray, dry chemical, carbon dioxide, Halon, or fog. Keep out of reach of children.

Precautionary Statements for disposal - Dispose in accordance with all federal, state and local regulations. See Section 13.

Hazards not otherwise classified (HNOC): The bacteria contained in this product are strains of typically harmless soil and water bacteria, and are not associated with disease or infections under normal circumstances (Biosafety Level 1). However, reasonable precautions are in order. Handle as you would rich, dark soil or compost: keep it out of your mouth, eyes, lungs, and broken skin. Wash hands thoroughly after use. Remove and launder heavily soiled clothing separately before reuse. Persons with severely suppressed immune systems, such as those with advanced AIDS, or those taking anti-rejection drugs, or those undergoing chemotherapy should contact their physician before handling ordinary microbial products.

Revision Date: 09/30/2015

Unknown acute toxicity: 3% of the mixture consists of ingredients of unknown toxicity.

3. COMPOSITION/INFORMATION ON INGREDIENTS

Chemical Name	CAS No.	Weight %
Urea	57-13-6	25 - 30
Potassium Nitrate	7757-79-1	5 - 10
RZ3 Surfactant (Alkoxylated Glucopyranoside)	Trade Secret	1 - 5
Iron EDTA	15708-41-5	1
Manganese EDTA	15735-84-5	0.1 - 0.5
Copper EDTA	14025-15-1	0.1 - 0.5
Zinc EDTA	14025-21-9	0.1 - 0.5
Boric Acid	10043-35-3	0.15
Precipitated silica	7631-86-9	0.06
Ammonium Molybdate	12027-67-7	0.0015
Bacteria*	68038-70-0	20 million cfu/g
Nonhazardous fertilizers and fillers	Various	Balance

^{*}Bacteria is present on a carrier of maltodextrin. Baceria mass is too insignificant to express as percent weight.

4. FIRST AID MEASURES

Eye Contact Rinse eyes cautiously with water for several minutes. Remove any contact lenses if easy to do, and

continue rinsing. If discomfort or irritation persists contact a physician.

Skin Contact Wash with soap and water. If injury occurs, or if discomfort or irritation persists or rash occurs, contact a

physician.

Inhalation If inhaled and discomfort occurs, move to fresh air, and keep person at rest in a position comfortable for

breathing. If difficulty in breathing occurs and/or persists, administer oxygen and get medical attention.

If medical advice is needed, have product container or label on hand.

Ingestion IF SWALLOWED: Rinse mouth. Immediately call a POISON CENTER or doctor/physician. Do not induce

vomiting of an unconscious person.

<u>Self-protection of the first aider</u>: Use any appropriate personal protective equipment as required for nuisance dusts.

<u>Most important symptoms and effects, both acute and delayed:</u> Nuisance dust irritation may occur with nasal discomfort under highly dusty conditions.

<u>Indication of any immediate medical attention and special treatment needed</u>: Treat Symptoms. Consult physician if discomfort or irritation persists. Get medical advice or attention if you feel unwell.

5. FIRE FIGHTING MEASURES

Suitable extinguishing media

Use extinguishing media suitable to local circumstances and the surrounding environment. Options in this case include water spray, CO₂, ABC Dry Chemical extinguisher, or fog. Avoid stirring up dust with extinguisher stream. This oxidizing material can increase the flammability of adjacent combustible materials.

Specific hazards arising from the chemical

Contains an oxidizer. Will increase intensity of fire. This oxidizing material can increase the flammability of adjacent combustible materials. Thermal decomposition can lead to release of irritating and toxic gases and vapors. In the event of fire, do not breathe fumes.

Explosion data

Sensitivity to mechanical impact: None Sensitivity to static discharge: None

Note: Excessive amounts of any burnable dusts can produce explosive mixtures if allowed to disperse in the air in confined areas where ignition sources occur. Prevent excessive dust dispersal in areas of use, storage, or production.

Potassium nitrate is an NFPA Class 1 oxidizer:

- Slightly increases the burning rate of combustible materials.
- Does not cause spontaneous ignition when in contact with combustible materials.

Protective equipment and precautions for firefighters

As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and standard protective (bunker) gear.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment, and emergency procedures

as required to prevent contact with eyes or skin. Remove ignition sources prior to clean-

Revision Date: 09/30/2015

up.

Environmental precautions Prevent entry into waterways, sewers, basements or confined areas. Do not flush into

surface water or sanitary sewer system. See Section 12 for additional ecological

information.

Methods for containment Prevent further leakage or spillage, if safe to do so.

Methods for clean-up

Use dust mask and/or reasonable personal protective equipment as required to avoid

breathing dusts. Moisten or cover powder spill with plastic sheet or tarp to minimize spreading. Take up mechanically, placing in appropriate containers for disposal. Avoid creating dust. Soak up excess with inert absorbent material. Clean contaminated surface

thoroughly.

7. HANDLING AND STORAGE

Safe Handling Read and understand all safety precautions before handling. Ensure adequate ventilation,

especially in confined areas. Use personal protective equipment as required to avoid breathing product dusts or mists, and to prevent eye contact. Wash hands thoroughly after handling.

Storage Conditions Keep containers tightly closed in a cool, well- ventilated place. Keep out of the reach of children.

Incompatible materials
Avoid strong acids or alkali, or other reactive substances.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Exposure Guidelines

Chemical Name	ACGIH TLV	OSHA PEL	NIOSH IDLH*
Iron salts, soluble, as Fe	1 mg/m ³	Not Established	Not Established
Boric Acid	2 mg/m ³ TLV 6 mg/m ³ Ceil	Not Established	Not Established
Nuisance Dusts	uisance Dusts 10 mg/m³ (TWA- Total dust)		Not Established

^{*}IDLH refers to amounts that are "Immediately Dangerous to Life or Health"

Engineering controls: Use with adequate ventilation and follow safe work practices to prevent dust buildup in air.

<u>Individual protection measures</u>: Wear protective gloves/ flame -retardant protective clothing/eye protection/face protection.

Eye protection Safety glasses, or goggles if eye contact is likely.

Skin and Body Protection Gloves and fire/flame resistant/retardant clothing.

Respiratory Protection Dust mask recommended for dusty or misty conditions. If exposure limits are

exceeded or irritation is experienced, NIOSH/MSHA approved respiratory protection should be worn. Respiratory protection must be provided in

Revision Date: 09/30/2015

accordance with current local regulations.

General Hygiene When using product, do not eat, drink or smoke. Wash hands thoroughly after

handling. Wash contaminated clothing before reuse.

9. PHYSICAL AND CHEMICAL PROPERTIES

Physical state Solid

Appearance Coarse powder

Color Mixed, various with blue powder

Odor Slight

Odor Threshold No information available

pH Not applicable
Melting point/freezing point Not applicable
Boiling point / boiling range Not applicable

Flash point No information available

Evaporation rate Not applicable

Flammability (solid, gas) No information available

Flammability Limit in Air

Upper flammability limit: No information available Lower flammability limit: No information available

Vapor pressure Not applicable Vapor density Not applicable

Bulk Density Approx. 0.9 g/cc (56.2 Lb per cu ft.)

Water solubility Mostly soluble in water, but 36% will not dissolve.

Solubility in other solvents
Partition coefficient
Autoignition temperature
Decomposition temperature
No information available
No information available
No information available

Oxidizing properties Contains an oxidizer @ 5 - 10% of dry weight.

10. STABILITY AND REACTIVITY

Reactivity

Contains an oxidizer

Chemical stability

Reactive as an oxidizer.

Possibility of Hazardous Reactions

May release heat and fumes when mixed in solution with incompatible reactive materials. Will increase intensity of fire.

Roots Fertilizer for Trees 27-9-9; Roots PHC for Trees 27-9-9

Hazardous polymerization

Will not occur.

Conditions to avoid

High heat, sparks and open flames, as some ingredients may be burnable.

Incompatible materials

Strong acids or alkali, or other reactive substances.

Hazardous Decomposition Products

May emit toxic fumes under fire conditions, such as Nitrogen oxides (NOx), Ammonia, Oxides of sulfur, Hydrogen chloride and Carbon monoxide.

11. TOXICOLOGICAL INFORMATION

Routes of exposure: Ingestion, eyes (contact), skin (contact), dust inhalation

Symptoms May irritate the digestive tract if ingested in quantity, causing nausea, vomiting and diarrhea.

After absorption of high quantities: Blood in stool. Methemoglobinemia. The following symptoms may appear later: Blue/grey discoloration of the skin. Dizziness. Feeling of weakness. Disturbances of heart rate. Headache. Disturbances of consciousness.

With repeated exposure/contact: Skin rash/inflammation.

Sensitization None Mutagenicity No data.

Carcinogenicity Contains EDTA. EDTA is not carcinogenic, but substances similar to EDTA (Nitrilotriacetic

acid [NTA] and its salts) were determined to be "possibly carcinogenic to humans" (Group 2B) by IARC, a compound which "may reasonably be anticipated to be a carcinogen" by NTP and

Revision Date: 09/30/2015

a "select carcinogen" by OSHA. EDTA may contain trace amounts of NTA.

Reproductive toxicity

There is limited evidence that <u>potassium nitrate</u> is a teratogen (birth defects) in animals.

In both short and long-term reproductive studies with animals, <u>boric acid</u> has been found to act as a reproductive toxin to males and females exposed to sufficient doses. Data from occupational exposures, accidental poisonings and epidemiological studies have not provided any conclusive information on the reproductive toxicity of boric acid in humans. (Note also that recent evidence has suggested that boron may be an essential micronutrient.)

STOT - single exposure
STOT - repeated exposure
No information available
No information available

Chronic toxicity With repeated exposure/contact: Skin rash/inflammation.

Target Organ Effects Lungs-Nuisance dusts; Testicular atrophy and spermatogenic arrest (boric acid-oral-dogs)

Aspiration hazard No information available

Other information: The bacteria contained in this product are natural strains of typically harmless soil and water bacteria, and are not associated with disease or infections under normal circumstances (Biosafety Level 1). However, reasonable precautions are in order. Handle as you would rich, dark soil or compost: keep it out of your mouth, eyes, lungs, and broken skin. Wash hands thoroughly after use. Remove and launder heavily soiled clothing separately before reuse. Persons with severely suppressed immune systems, such as those with advanced AIDS, or those taking anti-rejection drugs, or those undergoing chemotherapy should contact their physician before handling ordinary microbial products.

12. ECOLOGICAL INFORMATION

Fertilizers may be harmful to aquatic life with short term effects, causing algal bloom and increased BOD, depending on the amount released.

Persistence and degradability Not applicable

Bioaccumulation Not expected to bioaccumulate based on composition.

Other adverse effects

No information available

13. DISPOSAL CONSIDERATIONS

Revision Date: 09/30/2015

This material, as supplied is not a hazardous waste according to federal regulations (40 CFR 261).

Disposal of wastes:

This product is a non-hazardous waste material suitable for approved solid waste landfills.

No EPA Waste Numbers are applicable for this product's components.

Dispose of in accordance with Local, State, and Federal regulations.

Contaminated packaging

No US Federal special packaging considerations at the date of this document. Follow local regulations.

14. TRANSPORT INFORMATION

Packing Group III

DOT:

Proper Shipping Name: 5.1 - Oxidizer Hazard Class: Not Applicable

IATA:

Proper Shipping Name: 5.1 - Oxidizing substances

Hazard Class: Not Applicable

IMDG/IMO

Hazard Class 5.1 - Oxidizing substances

Marine Pollutant No

15. REGULATORY INFORMATION

SARA 311/312 Hazard Categories

Acute: Yes Chronic: Yes

Fire: Yes (Oxidizer)

Sudden release of pressure: No

Reactive: Yes (Oxidizer)

TSCA 8(b) inventory: Potassium nitrate

SARA 302/304/311/312 hazardous chemicals: Potassium nitrate

SARA 311/312 MSDS distribution - chemical inventory - hazard identification: Potassium nitrate: Fire hazard, Delayed (chronic) health hazard

SARA/CERCLA

This material contains one or more of the following chemicals required to be identified under SARA Section 302 (40 CFR 355 Appendix A), SARA Section 313 (40 CFR 372.65) and/or CERCLA (40 CFR 302.4):

Potassium nitrate (7757-79-1) SARA 313:

• 1 % de minimis concentration (Chemical Category N511) (related to Water Dissociable Nitrate Compounds)

There may be specific reporting requirements at the local, regional, or state level pertaining to releases of this material.

• Contains manganese compounds, 313 Category N450.

Clean Water Act: This product does not contain any substances regulated as pollutants pursuant to the Clean Water Act (40 CFR 122.21 and 40 CFR 122.42).

Roots Fertilizer for Trees 27-9-9; Roots PHC for Trees 27-9-9 Revision Date: 09/30/2015

State Regulations

Component Analysis – State Potassium nitrate on the state Right-to-Know list for MA, NJ and PA.

California Proposition 65: No listed ingredients

International Inventories

Component Analysis - WHMIS IDL

The following components are identified under the Canadian Hazardous Products Act Ingredient Disclosure List:

Component	CAS#	Minimum Concentration or classification	
Manganese EDTA	15735-84-5	1% (related to elemental manganese, Mn)	
Potassium nitrate	7757-79-1	Disclosure at 1% according to classification criteria	
Boric acid	10043-35-3	D2A, D2B. Disclosure at 0.1% according to classification criteria	

16. OTHER INFORMATION

Potassium nitrate is an NFPA Class 1 oxidizer:

- slightly increases the burning rate of combustible materials.
- does not cause spontaneous ignition when in contact with combustible materials.

Disclaimer

The information provided in this material safety data sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as guidance for safe handling, use, processing, storage, transportation, disposal, and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.
