

büji Block® and büji Wash® Complete Poison Ivy/Oak Protection

büji Block and **büji Wash** target the source of poison ivy/oak allergic reactions—urushiol oil. The products are effective at offering protection and relief when used separately, but deliver an especially potent protective force when used together.

“It is my goal to get büji in as many hands as possible. Poison ivy exposure can be and usually is extremely painful and debilitating. The more people that know about your products, the safer we all are. Thank you very much.”

--Anne Keller, Florida Fish and Wildlife Conservation Commission

büji Block is a dual-acting, pre-contact protective lotion that helps guard against poison ivy/oak allergic reactions and features SPF 24 sunscreen protection.

When applied, it forms a protective layer on skin that is **clinically shown** to help inhibit absorption of urushiol, the toxic oil in these plants that often causes allergic skin reactions.

FEATURES:

- Up to 6-hour protection
- UVA/UVB mineral sunblockers zinc oxide and titanium dioxide
- Water resistant
- Dermatologist and pediatrician tested
- Contains no parabens, petrolatum, dimethicone, dyes or fragrances

with büji without büji

büji Block Stock # 25320

Unit Price: \$12.95 6+ price break: \$11.95

büji Wash is a specially formulated cleanser that removes urushiol oil—the source of allergic reactions— anytime after exposure or after symptoms appear for fast relief of itching and irritation. **büji Wash** is also recommended for use to remove **büji Block** either before re-applying or upon heading indoors as an added safeguard against skin that may have missed a thorough application of **büji Block**.

FEATURES:

- Hypoallergenic
- Dye and fragrance free
- Dermatologist and pediatrician tested
- Safe for use on entire body
