

Cygnets BioBlend II WSP

BIOLOGICAL WATER QUALITY ENHANCER

BioBlend II WSP (water soluble packets) is a formulation of beneficial pond bacteria, for use in ponds, lakes, lagoons, fish & shrimp hatcheries and similar aqua-environments. It naturally removes excess ammonia-causing and nitrite-causing wastes from the water, while simultaneously removing problem-causing nitrates and phosphates. It also naturally removes decaying organic wastes such as grass clippings, leaves, excess fertilizer runoff, dead plants and animal wastes. Plus, it eliminates murky water, odors and bottom sludge, caused by organic waste buildup.

BioBlend II WSP is packaged into pre-measured, one-half pound water-soluble packets to simplify dosing. Simply apply around the edges of the pond, as long as water temperatures are above 55° F. Wait 48 hours after the use of a pesticide before applying product.

Initial Dose:

8 Pounds (16 Packets) per Surface Acre of Water

Maintenance:

4 Pounds (8 Packets) per Surface Acre of Water

- Reduces Ammonia
- Reduces Nitrite & Nitrate
- Reduces Phosphate
- Reduces Bottom-Sludge
- Reduces Odors
- Reduces Murky Water

Cygnets Enterprises, Inc.

800-359-7531

www.cygnetsenterprises.com

Net Wt. 25 lbs.

**(Contains 50 one-half pound
Water-Soluble Packets)**
