### No. 18098

E-Z Ject Lance

### No. 18099

Glyphosate Capsules

(Contains same active ingredient as Accord® and RoundUp®)

### No. 18100

Imazapyr Capsules

(Contains the same active ingredient as Arsenal®)

### E-Z Ject Lance Herbicides

The E-Z Ject Lance, a herbicide capsule injection system, is great for controlling unwanted vegetation safely and efficiently. Simply use it to inject a herbicide capsule directly into selected trees or brush without causing danger to surrounding vegetation.

The herbicide kills roots as well as stems and foliage, and since there are no chemicals to mix or measure, the operator never contacts the herbicide being used. Herbicide capsules are sold separately.

A list of herbicides including what each will kill for use in the E-Z Ject Lance. Inject

one capsule every 4" evenly around the trunk (below all major branches). Trees less than 2-1/2" diameter receive 1 capsule per stem. Pack of 1,200 capsules.

**Note:** These capsules cannot be sold in California, Iowa, Nebraska, Connecticut, North Dakota or in the state of Washington. Proof of license or permit is required for sales to Hawaii and Texas.

### Tech Support

800-430-5566

If you need more information or would like advice from an experienced professional, call our Technical Support team.

### Sales

800-647-5368

Our sales department will gladly fax you an order form, update you on pricing, or take your order over the phone.
